Eight-thirty Friday Morning
WASHINGTON UNIVERSITY

One Hundred and Thirty-Eighth

COMMENCEMENT
WASHINGTON UNIVERSITY

Founded in 1853, the University was located in downtown St. Louis for its first fifty years. Ground for a new site on the edge of the city was purchased in 1894 and in 1900 construction was begun on the first five buildings of a plan based upon the medieval courtyards of Oxford and Cambridge Colleges.

These first ivy covered Gothic buildings with their red granite walls, arches and gargoyles formed the quadrangle. Upon completion, these original buildings were leased to the 1904 World’s Fair. The lease money made it possible to begin construction of additional buildings and all were used for the Fair before the University moved in. The athletic stadium, Francis Field, was built to accommodate the 1904 Olympic games, presented in conjunction with the Fair.

Over the years, the original “Academic Gothic” architecture has been succeeded by a variety of eclectic styles, but certain key principles of the original plan were retained. Plazas and courtyards still reflect the original theme.

Washington University and other American universities, public and private, follow the pattern of degree granting developed at the University of Paris, which was founded about 1100.

In the early days of the University of Paris the discipline of the students, and indeed their entire education fell under the jurisdiction of the Bishop of Paris who was responsible for local educational matters. In an attempt to perform his office, the Bishop claimed supervision of curriculum and degree-granting. Here he ran into trouble from the teachers who felt they were the proper judges of the qualifications of their students. They demanded the right to grant the degree.

The modern commencement ceremony represents a compromise between the Bishop and the teaching masters. By 1200 the masters were judging the merits of the student and then recommending him to the Bishop who conferred the degree. The ceremony you will witness this morning is the successor to this medieval compromise. The Faculty sits on the platform in its role as teacher and examiner. Its leaders, the Deans, present the qualified candidates to the Chancellor. Acting upon the recommendation of the Faculty, the Chancellor, as executive officer of the Board of Trustees, formally confers the appropriate degree.

**ACADEMIC DRESS**

The academic dress worn by Faculty and candidates have their origins in the clerical robes worn by the students and teachers at the earliest medieval universities. American colleges and universities adopted a code of academic dress in 1895 that included regulating the cut and style of the gowns and prescribing colors to represent the different fields of learning. The code, which has since been updated and revised, is recommended for use by U.S. colleges and universities. The design of caps and gowns is determined by the following.

**Level of degree earned (bachelor's, master's or doctor's):** This is reflected in the design of the basic black gown—how full it is, whether or not it has trim on the sleeves, and the design of the sleeves, either pointed or rounded. The gown for the bachelor's degree, which is designed to be worn open or closed, has pointed sleeves. The gown for the master's degree, which can be worn open or closed, has an oblong sleeve. The doctor's degree gown can be worn open or closed and has bell-shaped sleeves. Bachelor's and master's degree gowns are untrimmed. The gown for the doctor's degree is faced down the front with black velvet and three bars of velvet across the sleeves. The color of the facings and crossbars may reflect the distinctive color of the discipline to which the degree pertains.

**Institution granting the degree:** Some institutions use their school colors—rather than basic black—for the gowns. The institution also is reflected in the hoods. The backs of the hoods are lined with silk showing the colors of the institution granting the degree, or the institution with which the wearer is connected. Washington University's hood is lined with red and green, the school's official colors. The color of the tassel on the cap and of the velvet edging of the hood, carried forward around the throat, indicates the division of the university.

**Title of degree:** This is reflected by the color of the trim on the front of the hood. Examples would be:
- White—Arts, Letters, Humanities; Silver Beige—Business;
- Light Blue—Education; Brown—Art, Dark Blue—Philosophy;
- Citron—Social Work; Golden Yellow—Science;
- Purple—Law; Orange—Engineering; Green—Medicine;
- Blue Violet—Architecture.

**BANNERS**

In addition to the coloring present in the academic dress, the division is also represented on the University's Commencement banners. These banners are carried by a student marshal at the head of the procession for their division. You will note that the side sections of the banners are red and green, the University's colors, and that the center section, which bears the seal of the University, is the color of the academic division.

**THE QUADRANGLE**

The site of the University Commencement Ceremony each spring, the Quadrangle is surrounded by the University's four oldest buildings: Brookings Hall to the east, Ridgley Hall to the west, Cupples Hall to the north and Busch Hall to the south. All four buildings were used by the Louisiana Purchase Exposition Company during the 1904 World's Fair. The outdoor stage was added in 1965 and named after Louis D. Beaumont, founder of the May Department Store Company.

The Quadrangle contains a number of commemorative plaques and inscriptions. As you walk up the main steps leading to the archway separating North and South Brookings Hall, two inscriptions on the east facade recognize the University's original founding in 1853 as Eliot Seminary and its re-christening as Washington University in 1857. The Latin inscription above the archway reads: Discere et Cumpi: Intra: Salvere Lubemus ("If you desire to learn, enter: We bid you welcome").

The plaque embedded in the ground beneath the Brookings Hall archway honors Washington University's founder and first Chancellor William Greenleaf Eliot. The plaque was given to the University during the centennial celebrations in 1953 by the Unitarian Church of St. Louis. Finally, on the west facade of Brookings Hall above the clock the Latin inscription reads: Cedunt Honae, Opera Mament ("The hours go by, but the works remain").

**UNIVERSITY SEAL**

The University seal (on the cover) was developed by Holmes Smith, Professor of Drawing and History of Art, 1896, using elements from the coat of arms of George Washington (after whom the University was named) and fleur de lis, the symbol of King Louis IX (patron and namesake of St. Louis). The seal was officially adopted by the Board of Trustees in March 1897. The University’s motto, which appears inside an open book in the middle of the University seal, is Per Veritatem Vis, "Strength through Truth." The motto was adopted in 1915. The current version of the University seal was created in the mid-1980s when the University's logotype was developed, incorporating many of the same elements.
ORDER OF EXERCISES

Academic Procession
*The Mighty Mississippi Concert Band of St. Louis*
Directed by Dan Presgrave
Director of Instrumental Ensembles at
Washington University

“America the Beautiful”
*Lori Ann Barrett*

Welcoming Remarks
*Mark S. Wrighton*
Chancellor of the University

Commencement Address
*William H. Danforth*
Chairman of the Board
“Yesterday, Today and Tomorrow”

Conferral of Honorary Degrees
*Chancellor Wrighton*
Assisted by members of the Board of Trustees

Remarks
*Jamar Kazan Ray*
Senior Class President

Conferral of Academic Degrees
*Chancellor Wrighton*
Assisted by the Executive Vice Chancellor, Edward S. Macias

The Chancellor’s Message to the 1999 Graduates

“Alma Mater”
*James Oliver Harr*

The text of the “Alma Mater” is located in the back of the program.
ORDER OF PROCESSION

Grand Marshal
Associate Grand Marshal
Honorary Grand Marshal
Chancellor
Chairman of the Board of Trustees and Commencement Speaker
Secretary of the Faculty Senate
Student Speaker
Honorary Degree Recipients
Vocalists

Edward N. Wilson
James Robert Burmeister
Robert H. McDowell
Mark S. Wrighton
William H. Danforth
Jack Clarence Knight, Jr.
Jamar Kazan Ray
Lori Ann Barrett
James Oliver Harr

I Members of the Board of Trustees and University Administration
   Marshal

II Deans and Members of the Faculty
   Marshal

III Class of 1949
   Marshal

Harriet K. Switzer
Edward S. Macias
Laura H. Ponte
CEREMONIAL, COMMENCEMENT AND STUDENT MARSHALS

Ceremonial Marshals are charged with the responsibility of hooding Student Marshals during the commencement exercises when degrees are conferred to each division. Commencement Marshals lead each division during the opening commencement procession. Student Marshals are selected by the deans of each division to represent the student body of their division. The Student Marshals carry the divisional banners and signs during the procession.

Ceremonial Marshals

Milica Banjanin and David Thomas König

The School of Medicine
School Color: Green
Commencement Marshal
Doctor of Medicine
Student Marshal
Master of Health Administration
Student Marshal
Master of Science in Physical Therapy
Master of Science in Occupational Therapy

Phillip Marks Ecker, Monica Catherine Lewis, Michael Edward Scoville
EMERITUS APPOINTMENTS

Each year some members of the Washington University faculty reach the rank of emeritus. Through teaching, scholarship and service, they have enriched the University and the lives of their students and colleagues. In appreciation for what they have done, we record here the names of those who attain emeritus rank by the end of the academic year 1998-1999.

Richard W. Brand
Professor of Biomedical Science; Professor of Biomedical Engineering;
Adjunct Professor of Anatomy and Assistant Dean for Admissions and Student Affairs
At Washington University since 1965

Leonard Berg
Professor of Neurology
At Washington University since 1950

Martin Bergmann
Associate Professor of Clinical Surgery
(Cardiothoracic Surgery)
At Washington University since 1950

David Feldman
Instructor in Clinical Medicine
At Washington University since 1975

Julian B. Fleischman
Associate Professor of Molecular Microbiology
At Washington University since 1964

William H. Gass
David May Distinguished University Professor in the Humanities;
Professor of Philosophy; Professor of Comparative Literature and
Director, International Writers Center
At Washington University since 1969

Jules B. Gerard
Professor of Law
At Washington University since 1962

Neville Grant
Professor of Clinical Medicine
At Washington University since 1954

Johns W. Hopkins
Professor of Biology
At Washington University since 1966

Harold J. Joseph
Professor of Clinical Medicine
At Washington University since 1951

George S. Kobayashi
Professor of Microbiology in Medicine and
Professor of Microbiology
At Washington University since 1964

Stanley Lang
Instructor in Physical Therapy
(Professor Emeritus of Physiology and Biophysics, September 1, 1981)
At Washington University since 1955

David M. Lieberman
Associate Professor of Clinical Medicine
At Washington University since 1950

Morton A. Levy
Associate Professor of Clinical Medicine
At Washington University since 1965

Peter E. Marcus
Professor of Art
At Washington University since 1967

Robert E. Morrell
Professor of Japanese Language and Literature
and Professor of Comparative Literature
At Washington University since 1965

J. Roger Nelson
Assistant Professor of Clinical Medicine
At Washington University since 1957

Charles C. Norland
Professor of Clinical Medicine
At Washington University since 1968

Robert F. Owen
Instructor in Clinical Medicine
At Washington University since 1952

Peter R. Phillips
Professor of Physics
At Washington University since 1963

Mabel Louise Purkerson
Professor of Medicine; Assistant Professor of Pediatrics and Associate Dean for Academic Projects
At Washington University since 1957

Michel Rybalka
Professor of French and Professor of Comparative Literature
At Washington University since 1972

Jerome P. Schiller
Professor of Philosophy
At Washington University since 1964

Milton J. Schlesinger
Professor of Molecular Microbiology
At Washington University since 1964

Bernd Silver
Associate Professor of Clinical Ophthalmology and Visual Science
At Washington University since 1964

Ronald K. Sundfors
Professor of Physics
At Washington University since 1963

Carl P. Wellman
Hortense and Tobias Lewin Professor in the Humanities and
Professor of Philosophy
At Washington University since 1968

Charles M. Wolfe
Professor of Electrical Engineering
At Washington University since 1975
HONORARY GRAND MARSHAL

ROBERT H. MCDOWELL

Robert H. McDowell has exemplified the ideals of academic life at Washington University for nearly 40 years. He is an established scholar, splendid teacher, and accomplished administrator whose interests and knowledge range across the entire spectrum of intellectual and artistic pursuits. His extraordinary contributions to the University and its students have enriched our cultural life, helped to mold our sense of purpose, and clarified our educational philosophy.

Professor McDowell's undergraduate training in the late 1940s at the University of Chicago resulted in the conferral of three degrees: the Bachelor of Philosophy, Bachelor of Science, and Master of Science in Mathematics. Subsequently, he served for two years in the U.S. Army as part of a High Speed Computing team at the Aberdeen Proving Ground and continued his involvement with computer development as an Assistant Mathematician at Argonne National Laboratory. These efforts resulted in his 1985 recognition as a pioneer in computing by the Association for Computing Machinery. In the mid-1950s, he embarked on doctoral studies in mathematics at Purdue University and was a Fulbright Scholar at the University of Amsterdam during 1957-58, an Instructor in Mathematics at Rutgers University in 1959, and an Assistant Professor of Mathematics at Purdue in 1959-60. His Ph.D. from Purdue was conferred in 1959 with a dissertation in general topology.

Robert McDowell joined the Washington University faculty in 1960 as an Assistant Professor of Mathematics. Promotion through the faculty ranks resulted in his 1972 designation as a Professor of Mathematics. His scholarly contributions in topology are noted for their depth of understanding and mathematical creativity. The calculus textbook he co-authored with Leonard Gillman was heralded for its innovations and widely adopted by colleges and universities. Soon after his arrival at Washington University, Professor McDowell became a national leader in mathematics education, including membership on a writing team of the Mathematical Association of America (MAA) which produced an influential series of recommendations on the training of K-12 mathematics teachers. On leave of absence from Washington University, he served in 1964-65 as Associate Director of the MAA’s Commission on the Undergraduate Program in Mathematics and as the Commission’s Director in 1965-66. The energy and leadership he provided for this Commission have been described as being the root of most of the positive changes in undergraduate mathematics education which have occurred over the past thirty years.

Professor McDowell has served Washington University with great distinction. From 1974-1990 he was Chair of the Mathematics Department. In 1990 he was appointed as the first Director of the University’s Teaching Center and served in this capacity until 1996, earning the trust and respect of the entire faculty and stimulating the development both of exciting new courses and innovative teaching methods. He has been a member of over 40 University Committees, including two terms as Chair of the Senate Council, the University’s umbrella group for faculty governance. His keen academic judgment and capacity for rendering sound advice to students resulted in his being regarded as a permanent and essential member of the Compton and Fulbright Scholarship Committees.

Following his retirement from the University in 1998, Professor McDowell and his wife Attje have continued their role as hosts for innumerable gatherings of faculty and students. For generations of Washington University undergraduates, recollections of evenings at the McDowell's home have been among their most treasured University memories.
HONORARY DEGREES

WILLIAM H. DANFORTH
DOCTOR OF PHILOSOPHY

Dedicated, wise and sensitive, William H. Danforth, M.D., has devoted nearly a half-century of unparalleled service and distinguished leadership to Washington University. Whether reading bedtime stories to students during freshman orientation or fostering research partnerships with international corporations, Dr. Danforth has steadfastly managed to merge deep thought with thoughtfulness throughout his roles as a faculty member, medical administrator, chancellor and chairman of the Board of Trustees. Dr. Danforth’s caring nature first led him into the field of medicine. He received a medical degree from Harvard University in 1951, after having earned a bachelor’s degree from Princeton University in 1947 and serving in the U.S. Navy during World War II. Dr. Danforth began his association with Washington University in 1951, serving his residencies in medicine and pediatrics at Barnes and St. Louis Children’s hospitals from then until 1957. At that time, he was named as instructor at the School of Medicine. He was named assistant professor in 1960, associate professor in 1965 and full professor in 1967 — a position he still holds. In 1965, he was appointed vice chancellor for medical affairs. In 1971, Dr. Danforth became Washington University’s 13th chancellor. His 24-year tenure was one of the longest among educational leaders and created an extraordinary legacy of success. His far-reaching vision and his talents as an administrator, fund-raiser and fiscal manager, coupled with his sense of integrity and respect for traditional values, helped guide the University into national and international prominence. During his tenure, the number of Nobel Laureates associated with the University doubled. The number of faculty elected to the National Academy of Sciences also doubled, and the number of faculty serving as members of the Institute of Medicine and the American Academy of Arts and Sciences rose to all-time highs. Countless undergraduates successfully competed for prestigious awards, including Rhodes and Marshall scholarships, as well as Fulbright, Beinecke, Truman, Goldwater, Mellon, Putnam, National Science Foundation and National Graduate grants and fellowships. On the resource side, Dr. Danforth presided during a three-year capital campaign that raised $120 million in the 1970s and the highly successful Alliance Campaign that raised $630.5 million during the years 1982 to 1987. At the time of its completion, the Alliance Campaign was the most successful fund-raising campaign in the history of higher education. In addition, the market value of the University’s endowment grew eleven-fold from 1971 to 1994. Dr. Danforth retired as chancellor on June 30, 1995. The next day, he began a four-year term as chairman of the Board of Trustees, a post from which he will retire June 30. At that time, he will become vice chairman of the Board. He also will be named chancellor emeritus. From his University beginnings as a fellow in cardiology working in the laboratory of Nobel Prize co-winner Carl Cori, Dr. Danforth rose to become a member of the Institute of Medicine of the National Academy of Sciences. Among his many educational leadership roles are: chair of the Association of American Universities (1982-83), Business-Higher Education Forum chair (1992-94), University Athletic Association President’s Council chair (1988-1990), Independent Colleges and Universities of Missouri president (1979-1981), Institute of Medicine AIDS Research Committee chair (1989-1991), NIH Cardiovascular Study Section chair (1969-1970), and co-chair of the National Science Board Commission on the Future of the National Science Foundation (1992). A committed participant in the life of the St. Louis community, he has been active with numerous organizations and charities. These positions include: chair of the board of trustees of the Danforth Foundation (1966-1997), St. Louis Christmas Carols Association president (1958-1975) and chair (1975-present), United Way of Greater St. Louis board chair (1984-85) and campaign chair (1985), and chair of the Donald Danforth Plant Science Center (1998-present) — to name a few. He serves as a director of Ralston Purina Co. and formerly was a director of McDonnell Douglas Corp. Dr. Danforth served as chairman of the Desegregation Task Force of Civic Progress from July 1995 to May 1996, when he was appointed the St. Louis desegregation coordinator by the Federal District Court. His efforts helped deliver a positive result for the St. Louis city and suburban school districts, including a recent vote by city residents to tax themselves to help pay the cost of the program. Dr. Danforth married the former Elizabeth (Ibby) Gray in 1950. Mrs. Danforth received an honorary doctor of humanities degree from the University in 1995. The couple has four grown children and 15 grandchildren.

ALVIN GOLDFARB
DOCTOR OF HUMANITIES

Alvin Goldfarb is the retired president of Worth Stores Corporation, a St. Louis-based retailer of ladies apparel, and of the Alvin Goldfarb Foundation. Mr. Goldfarb earned a bachelor’s degree in business administration from Washington University in 1937 and began a career in retailing that would take him to the top of Worth’s. He and his family have been generous supporters of Washington University and many other charitable and religious organizations in the community. His late wife, Jeanette Rudman Goldfarb, graduated from the George Warren Brown School of Social Work in 1936 with a master’s of social work degree. She attended the school on a four-year scholarship. She went on to complete her field work in St. Louis in the years preceding the Great Depression. The Goldfarbs had three children together: a daughter, Jane, a 1962 graduate of Washington University’s School of Business who resides in St. Louis, and sons James and Robert, both of whom reside in New York City. He is grandfather to four grandchildren. Mr. Goldfarb’s deep commitment to his family extends to a caring regard for the wider community. His leadership skills and generosity have benefited the Jewish Federation of St. Louis, where he has served as director and as cam-
campaign chairman. He is also past chairman of the Israel Emergency Fund. A committed community leader and family man, Mr. Goldfarb is, in addition to these things, a man of vision who has shown extraordinary generosity toward Washington University. He and his wife were founding sponsors of the Scholars in Business Program in the John M. Olin School of Business. The Alvin and Jeanette Goldfarb scholarship has been an important part of that program since 1981. The family also has supported a range of recent building projects on campus, including the John M. Olin School of Business, the Jeanette Goldfarb Plant Growth Facility, and the Alvin Goldfarb Auditorium in James S. McDonnell Hall. The building that houses the St. Louis Hillhel Center adjacent to the University was named the Alvin and Jeanette Goldfarb House in recognition of the Goldfarbs’ support. And, thanks to Alvin Goldfarb’s vision and generosity, the George Warren Brown School of Social Work has been able to construct a new building, Alvin Goldfarb Hall. Mr. Goldfarb’s support for the new social work building has been especially critical to the project’s success because the school’s alumni, while doing critical work in our community, often do not have the financial means to support a building project of this magnitude. “Supporting the construction of this new building for the School of Social Work is an important way for me to contribute to Washington University’s future,” Mr. Goldfarb said as the building project was announced. “I believe that social workers perform an increasingly important function in society. Washington University’s strong institutional commitment to serving the community through this program will be further strengthened by the new facility. I hope that this gift will get the new building off to a great start.” Chancellor Mark S. Wrighton acknowledged the importance of the contribution, saying that “Alvin’s support at this time will enable the George Warren Brown School of Social Work to move forward into the new century, better equipped to train and educate students for their important role in society.” In 1996, the School of Social Work recognized Mr. Goldfarb’s many contributions to the school by awarding him the Dean’s Medal. School of Social Work Dean Shanti K. Khinduka praised Mr. Goldfarb for his support, saying that Mr. Goldfarb’s contribution had allowed the school to proceed with confidence into the next phase of a very substantial building project. The impact of his contribution will be felt not only by students on campus today, but also by generations of students to come, and, most importantly, by the people they serve as those students move into the work force after their training. He has played a truly significant role in building the University’s future as it enters the 21st Century.

PHILIP NEEDLEMAN
DOCTOR OF SCIENCE

Philip Needleman, Ph.D., chaired the medical school’s Department of Pharmacology from 1976 to 1989 and is now chief scientist at Monsanto Company and president of G.D. Searle, Monsanto’s pharmaceutical sector. As adjunct professor of molecular biology and pharmacology, he maintains close ties with the University, where he was elected Basic Science Teacher of the Year five times during his 22 years on the faculty. Dr. Needleman made news last year when the Food and Drug Administration approved Celebrex™, a new type of arthritis drug — the COX-2 inhibitor — that he conceived at the School of Medicine and developed at Monsanto. As well as being a leading expert on inflammation, he is recognized world-wide for his research on organic nitrates, his work on blood pressure regulation, and for the discovery of molecules that convey information from the heart to the kidneys. Born in Brooklyn, N.Y., Dr. Needleman was not a studious child. In high school, he played football and avoided homework; but he ignored his guidance counselor’s advice to skip college, obtaining both a bachelor’s degree in pharmacy in 1960 and a master’s degree in pharmacology in 1962 from the Philadelphia College of Pharmacy and Science. He earned a doctorate in pharmacology from the University of Maryland Medical School two years later. Dr. Needleman’s first studies focused on the enzymatic breakdown of organic nitrates, and he continued this work after moving to Washington University School of Medicine in 1964. When he would synthesize and purify nitroglycerin — which also is used to make gunpowder — he performed the task on Sundays so an explosion would eliminate only one member of his team. This early research revealed that nitroglycerin, which was taken by mouth for angina, is completely degraded by the liver before it can circulate around the body. As a result, patients now place nitroglycerin under the tongue, allowing it to directly enter the bloodstream. Dr. Needleman and a colleague also made the first compound that specifically blocks the hypertensive action of angiotensin II, a protein that contracts blood vessels. They used this compound to determine how angiotensin and a protein that relaxes blood vessels interact with other molecules to regulate blood flow to the kidney. Metabolites of arachidonic acid then became a major focus of Dr. Needleman’s work. He studied their roles in the kidney and heart and explored their contributions to inflammation and blood clotting. This led him to discover the first inhibitor of a platelet enzyme called thromboxane synthase. He also has been particularly interested in arachidonic acid metabolites called prostaglandins, which perform a range of regulatory functions but are largely responsible for the pain of arthritis and other inflammatory conditions. In 1989, Dr. Needleman’s experiments predicted that a key enzyme in prostaglandin synthesis called COX (cyclooxygenase) exists in two forms. Other scientists cloned the second enzyme, confirming that COX-1 synthesizes the prostaglandins.
that perform essential housekeeping functions in the stomach and platelets, whereas COX-2 makes prostaglandins involved in inflammation and tissue injury. In 1989, Dr. Needleman moved to Monsanto, where his group produced large amounts of COX-2 for study. They then synthesized and tested the compound that became Celebrex. By inhibiting COX-2 and not COX-1, Celebrex avoids the side effects associated with aspirin and other anti-inflammatory drugs. At the medical school in 1983, Dr. Needleman also discovered that peptide hormone now known as atrial natriuretic factor (ANF) is made by the heart to alert the kidney when the blood's volume or salt concentration is too high. This hormonal endocrine system allows the kidney to take corrective measures. With collaborators at Monsanto, Dr. Needleman quickly determined the complete amino acid sequence of several of these atriopeptins, determined how they were made, obtained evidence that they also are present in the brain, and located atriopeptin receptors in the kidney. This impressive body of research has garnered numerous honors, including the John Jacob Abel Award of the American Pharmacology Society in 1974, the Wellcome Creasy Award in Clinical Pharmacology in 1977, 1978, 1980 and 1987, the Cochems Thrombosis Prize in 1980, the Research Achievement Award from the American Heart Association in 1988, and an honorary doctorate of science from the Philadelphia College of Pharmacy and Science in 1994. Dr. Needleman also was elected to the National Academy of Sciences in 1987 and to the Academy's Institute of Medicine in 1993. He received Washington University's Distinguished Faculty Award on Founders Day in 1987 and a Second Century Award in 1994.

PATRICIA SCOTT SCHOEDER
DOCTOR OF HUMANITIES

Former Congresswoman Patricia Scott Schroeder, whose 24 years in office made her the longest serving woman in the House of Representatives, is renowned for her outspoken, independent leadership in the Democratic Party. A champion of policies affecting women and children, Mrs. Schroeder is recognized for her leadership on issues ranging from foreign and military policy to educational opportunities to women's health. Currently serving as president and chief executive officer of the Association of American Publishers Inc. (AAP), the national trade organization of the U.S. book publishing industry, Mrs. Schroeder left Congress undefeated in 1996. She had served 12 terms representing the First Congressional District of Colorado. From January to June 1997, she was on the Princeton University faculty as a professor at the Woodrow Wilson School of Public and International Affairs. She assumed her role at AAP on June 1, 1997. Mrs. Schroeder is the author of two books, Champions of the Great American Family and 24 Years of House Work ... and the Place Is Still a Mess. The latter is an autobiography detailing "her struggle to find her place and a voice in the male-dominated world of politics." Born in Portland, Oregon, Mrs. Schroeder graduated magna cum laude in 1961 with a bachelor's degree from the University of Minnesota. She went on to Harvard Law School as one of only 15 women in a class of more than 500 students. After earning her juris doctorate in 1964, she moved with her husband, James, to Denver, Colorado, where she worked as a field attorney with the National Labor Relations Board and later went into private practice. In 1972, she challenged the incumbent Republican for the First Congressional District, Representative James McKevitt. She ran on a platform opposing the Vietnam War, supporting environmental issues and challenging Colorado's bid for the Winter Olympics, arguing that the state could make better use of its tax dollars. The mother of two young children when she narrowly defeated McKevitt and won her first term in office, Mrs. Schroeder went on to become the first woman to serve on the House Armed Services Committee. She also served as dean of Congressional Women and co-chair of the Congressional Caucus on Women's Issues, which she helped found. Additionally, she was a member of both the House Judiciary Committee and the Post Office and Civil Service Committee. As chair of the House Select Committee on Children, Youth and Families from 1991-1993, Mrs. Schroeder saw the Family and Medical Leave Act and the National Institutes of Health Revitalization Act to fruition in 1993. Instrumental in the passage of a block grant program to fund day-care centers for school-age children, Mrs. Schroeder also authored and helped pass into law the Violence Against Women Act, the Child Support Responsibility Act, the Economic Equity Act, and the National Child Protection Act. Mrs. Schroeder was an early supporter of legalized abortion and sponsored legislation making it a federal crime to obstruct access to abortion clinics. She also was active in military issues, expediting the National Security Committee's vote to allow women to fly combat missions in 1991, and working to improve conditions for military families through passage of her Military Family Act in 1985. As chairwoman of several House Armed Services panels and subcommittees, Mrs. Schroeder led the first comprehensive committee effort to assess the costs and benefits of our country's defense alliances and spearheaded efforts on conversion of defense research and technology to civilian purposes. A leader in the cause of education and a champion of free speech, Mrs. Schroeder was always a multi-issue candidate. As a ranking member of the House Judiciary Subcommittee on Courts and Intellectual Property, she was one of the most knowledgeable members of Congress on copyright issues and a strong advocate for protecting intellectual property rights and for reinforcing the creative incentive for developing intellectual property. She continues this advocacy today in her leadership of AAP. Mrs. Schroeder also currently is leading New Century/New Solutions, a think tank for the Institute for Civil Society in Newton, Massachusetts.
that perform essential housekeeping functions in the stomach and platelets, whereas COX-2 makes prostaglandins involved in inflammation and tissue injury. In 1989, Dr. Needleman moved to Monsanto, where his group produced large amounts of COX-2 for study. They then synthesized and tested the compound that became Celebrex. By inhibiting COX-2 and not COX-1, Celebrex avoids the side effects associated with aspirin and other anti-inflammatory drugs. At the medical school in 1983, Dr. Needleman also discovered that peptide hormone known now as atrial natriuretic factor (ANF) is made by the heart to alert the kidney when the blood’s volume or salt concentration is too high. This hormonal endocrine system allows the kidney to take corrective measures.

With collaborators at Monsanto, Dr. Needleman quickly determined the complete amino acid sequence of several of these atriopeptins, determined how they were made, obtained evidence that they also are present in the brain, and located atriopeptin receptors in the kidney. This impressive body of research has garnered numerous honors, including the John Jacob Abel Award of the American Pharmacology Society in 1974, the Wellcome Creasy Award in Clinical Pharmacology in 1977, 1978, 1980 and 1987, the Cochems Thrombosis Prize in 1980, the Research Achievement Award from the American Heart Association in 1988, and an honorary doctorate of science from the Philadelphia College of Pharmacy and Science in 1994. Dr. Needleman also was elected to the National Academy of Sciences in 1987 and to the Academy’s Institute of Medicine in 1993. He received Washington University’s Distinguished Faculty Award on Founders Day in 1987 and a Second Century Award in 1994.

COMMISSIONS IN THE
DEPARTMENT OF DEFENSE

The following candidates will be commissioned by Lieutenant
Colonel Harold J. Burns, Jr., United States Army, Chair,
Military Science Department/Battalion Commander.

United States Army
Issued by the Secretary of the Army
Second lieutenant, United States Army
Nathan K Goodall
Joshua Charles Toothman
Chad A West
“It is not the critic who counts; not the man who points out how the strong man stumbles, or where the doer of deeds could have done them better. The credit belongs to the man who is actually in the arena, whose face is marred by dust and sweat and blood; who strives valiantly; who errs, and comes short again and again; because there is not effort without errors and shortcomings; but who does actually strive to do the deeds; who knows the great enthusiasms, the great devotions; who spends himself in a worthy cause, who at the best knows in the end the triumphs of high achievement and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who know neither the sweet taste of victory nor the bitter feeling of defeat.”

Theodore Roosevelt

**Senior Class Officers**

**Jamar Kazan Ray - President**
School of Engineering and Applied Science
DeSoto, Texas
Major in Mechanical Engineering
Member of National Society of Black Engineers and Member of Tau Pi Sigma fraternity

**Jeffrey Lynn Waugh - Internal Vice President**

ALMA MATER

Dear Alma Mater,
Thy name is sweet to me.
Our hearts are all for thee
Fair Washington.
Thy halls shall honored be
Throughout this great country
For all eternity, Our Washington.

Those days of youth which
All of us spent with thee
Form a dear history,
Fair Washington.
Could they renewed be,
We’d live our days with thee
For all eternity, Our Washington.
