One Hundred and Forty-Ninth

Commencement

May Twenty First
Two Thousand and Ten
Eight-Thirty Friday Morning
Founded in 1853, the University was located in downtown St. Louis for its first fifty years. Ground for a new site on the edge of the city was purchased in 1894. The site plan was developed by Frederick Law Olmstead in 1895 and the architecture firm of Cope and Stewardson, winner of the national competition, was selected in 1899. In 1900 construction was begun on the first five buildings of a plan based upon the medieval courtyards of Oxford and Cambridge Colleges.

These first Gothic buildings with their red granite walls, arches and grotesques formed the quadrangle. Upon completion, these original buildings were leased to the 1904 World’s Fair. The lease money made it possible to begin construction of additional buildings and all were used for the Fair before the University moved in. The athletic stadium, Francis Field, was built to accommodate the 1904 Olympic games, the first held in the Western hemisphere, and presented in conjunction with the Fair.

THE COMMENCEMENT CEREMONY

Washington University and other American universities, public and private, follow the pattern of degree granting developed at the University of Paris, which was founded about 1100. In the early days of the University of Paris the discipline of the students, and indeed their education fell under the jurisdiction of the Bishop of Paris who was responsible for local educational matters. In an attempt to perform his office, the Bishop claimed supervision of curriculum and degree-granting. Here he ran into trouble from the teachers who felt they were the proper judges of the qualifications of their students. They demanded the right to grant the degree.

The modern commencement ceremony represents a compromise between the Bishop and the teaching masters. By 1200 the masters were judging the merits of the student and then recommending him to the Bishop who conferred the degree. The ceremony you will witness this morning is the successor to this medieval compromise. The Faculty sits on the platform in its role as teacher and examiner. Its leaders, the Deans, present the qualified candidates to the Chancellor. Acting upon the recommendation of the Faculty, the Chancellor, as executive officer of the Board of Trustees, formally confers the appropriate degree.

ACADEMIC DRESS

The academic dress worn by Faculty and candidates have their origins in the clerical robes worn by the students and teachers at the earliest medieval universities. American colleges and universities adopted a code of academic dress in 1895 that included regulating the cut and style of the gowns and prescribing colors to represent the different fields of learning. The code, which has since been updated and revised, is recommended for use by U.S. colleges and universities. The design of caps and gowns is determined by the following:

Level of degree earned (bachelor's, master's or doctor's): This is reflected in the design of the gown—how full it is, whether or not it has trim on the sleeves, and the design of the sleeves. The gown for the bachelor's degree, designed to be worn open or closed, has pointed sleeves. The gown for the master's degree, which can be worn open or closed, has an oblong sleeve. The doctor's degree gown can be worn open or closed and has bell-shaped sleeves with three bars of velvet across the sleeves.

Institution granting the degree: The institution is reflected in the hoods for advanced degrees. The backs of the hoods are lined with silk showing the colors of the institution granting the degree, or the institution with which the wearer is connected. Washington University's hood is lined with red and green, the school's official colors. The color of the tassel on the cap and of the velvet edging of the hood, carried forward around the throat, indicates the division of the university.

White—Arts and Sciences (bachelors and masters); Dark Blue—Arts and Sciences (PhD); Brown—Art; Silver Beige—Business; Orange—Engineering; Blue Violet—Architecture; Purple—Law; Citron—Social Work; Golden Yellow—University College; Green—Medicine; Gold—denotes honorary degrees awarded by Washington University Board of Trustees.

BANNERS

In addition to the coloring present in the academic dress, the division is also represented on the University's Commencement banners. These banners are carried by a student marshal at the head of the procession for their division. You will note that the side sections of the banners are red and green, the University's colors, and that the center section, which bears the seal of the University, is the color of the academic division.

THE QUADRANGLE

The site of the University Commencement Ceremony each spring, the Quadrangle, is surrounded by four of the University's oldest buildings: Brookes Hall to the east, Ridgley Hall to the west, Cupples Hall I to the north and Busch Hall to the south. Beaumont Pavilion, the outdoor stage, was added in 1965.

The Quadrangle contains a number of commemorative plaques and inscriptions. As you walk up the main steps leading to the archway separating North and South Books Hall, two inscriptions on the east façade recognize the University's original founding in 1853 as Eliot Seminary and its re-naming as Washington University in 1857. The Latin inscription above the archway reads: Discere Si Cupias Intra: Salvere Iubemus (“If you desire to learn, enter: We bid you welcome”).

The plaque embedded in the stone beneath the Brookes Hall archway honors Washington University's founder, first Chairman of the Board and the third Chancellor, William Greenleaf Eliot. The plaque was given to the University during the centennial celebrations in 1953 by the First Unitarian Church of St. Louis. The large granite plaque in the plaza in front of Brookes Hall commemorates the naming of the Danforth Campus in 2006. Finally, on the west façade of Brookes Hall above the clock the Latin inscription reads: Cedunt Horae, Opera Manent (“The hours go by, but the works remain”).

THE UNIVERSITY SEAL

The University seal (on the cover) was developed by Holmes Smith, Professor of Drawing and History of Art, 1896, using elements from the coat of arms of George Washington (after whom the University was named) and fleur de lis, the symbol of King Louis IX (patron and namesake of St. Louis). The seal was officially adopted by the Board of Trustees in March 1897. The University's motto, which appears inside an open book in the middle of the University seal, is Per Veritatem Vis, “Strength through Truth.” The motto was adopted in 1915. The current version of the University seal was created in 2000 incorporating the same elements.
ORDER OF EXERCISES

The Mighty Mississippi Concert Band of St. Louis
Directed by Dan Presgrave
Director of Instrumental Ensembles at
Washington University

“America the Beautiful”
Thomas W. Sitzler

Remarks
Stephen F. Brauer
Chair of the Board of Trustees

Commencement Address
Steven Chu
U.S. Secretary of Energy

Conferral of Honorary Degrees
Mark S. Wrighton
Chancellor of the University
Assisted by Members of the Board of Trustees

Remarks
Fernando Szpilman Cutz
Senior Class President

Conferral of Academic Degrees
Chancellor Wrighton
Assisted by Provost and Executive Vice Chancellor Edward S. Macias

The Chancellor's Message to the Graduates

“Alma Mater”
Stephanie Ann Ball
The text of the “Alma Mater” is located on the back cover of the program

Academic Recession
Please remain in place until the processional members exit the Quadrangle
ORDER OF PROCESSION

Grand Marshal
Robert E. Wiltenburg

Associate Grand Marshal
James R. Burmeister

Honorary Grand Marshal
Peter Riesenberg

Chancellor
Mark S. Wrighton

Chair of the Board of Trustees
Stephen F. Brauer

Chairman of the University's Faculty Senate Council
Andrew C. Sobel

Commencement Speaker
Steven Chu

Student Speaker
Fernando Szpilman Cutz

Honorary Degree Recipients

Vocalists
Stephanie Ann Ball
Thomas W. Sitzler

Members of the Board of Trustees and University Administration
Marshals
Ida H. Early
Larry Kindbom

Deans and Members of the Faculty
Marshals
Edward S. Macias

Class of 1960
Marshals
Amee Meyers Colvin
CEREMONIAL, COMMENCEMENT AND STUDENT MARSHALS

Ceremonial Marshals are charged with the responsibility of hooding the Student Marshals for the graduate divisions during the commencement exercises. The Commencement Marshals lead each division during the opening commencement procession. They are followed by the Student Marshals who are selected by the deans of each division to represent the student body of their division. The Student Marshals carry the divisional banners and signs during the procession.

Ceremonial Marshals — Enola K. Proctor and Martin H. Israel

SCHOOL OF MEDICINE
School Color: Green
Commencement Marshal — Leslie E. Kahl
Doctor of Medicine
Student Marshal — Bradley John Carra
Doctor of Audiology
Student Marshal — Rose Ellen Wright
Doctor of Occupational Therapy
Student Marshal — Ashley Nichole Wagner
Doctor of Physical Therapy
Student Marshal — Christy Lynn Waechter
Master of Psychiatric Epidemiology
Master of Science in Clinical Investigation
Master of Science in Deaf Education
Master of Science in Genetic Epidemiology
Master of Science in Occupational Therapy
Student Marshal — Lisa Jean Merlo

GEORGE WARREN BROWN SCHOOL OF SOCIAL WORK
School Color: Citron
Commencement Marshal — Carolyn Kornfeld Lesorogol
Master of Social Work
Student Marshals — Nishesh Chalise, Joseph Connolly Jovanovich

SAM FOX SCHOOL OF DESIGN & VISUAL ARTS

COLLEGE OF ART
GRADUATE SCHOOL OF ART
School Color: Brown
Commencement Marshal — Georgia Binnington
Master of Fine Arts
Student Marshal — Nicolette Marie Ross
Bachelor of Fine Arts
Student Marshals — Kathryn Anne Ford, Kimberly Erin Wardenburg

COLLEGE OF ARCHITECTURE
GRADUATE SCHOOL OF ARCHITECTURE & URBAN DESIGN
School Color: Blue-Violet
Commencement Marshal — Peter B. MacKeith II
Master of Architecture
Master of Urban Design
Student Marshals — Charles Bradley Cooke, Margaret McLarty Cooke
Bachelor of Technology in Architectural Technology
Student Marshal — Nancy R. Schick
JOHN M. OLIN SCHOOL OF BUSINESS
School Color: Silver-Beige
Commencement Marshal — Glenn MacDonald
Master of Accounting
Master of Business Administration
Master of Science in Business Administration
Master of Science in Finance
Master of Science in Supply Chain Management
Student Marshals — Ryan Arthur Arp, Robert Pajewski
Bachelor of Science in Business Administration
Student Marshal — Ryan Cameron Courson

SCHOOL OF ENGINEERING AND APPLIED SCIENCE
School Color: Orange
Commencement Marshal — J. Christopher Kroeger
Doctor of Science
Student Marshal — Allen Burnett McCoy III
Master of Science
Student Marshal — Samuel Friend Wight
Bachelor of Science
Student Marshals — Alexandra Beth Chakeres, Christine Elizabeth Hansen, Cameron Conrad Smith

SCHOOL OF LAW
School Color: Purple
Commencement Marshal — Annette Ruth Appell
Doctor of Law
Master of Laws
Doctor of the Science of Law
Student Marshals — Beth Erin Frohlichstein, Jae Sung Im, Amy Marie Nicks

GRADUATE SCHOOL OF ARTS AND SCIENCES
School Color for Doctors: Dark Blue
Commencement Marshal — Elaine Berland
Doctor of Philosophy
Student Marshals — Andrew Cox Butler, Keona Katrice Ervin, Tracy Felicia Nicholson, Pinaki Sarder
School Color for Masters: White
Commencement Marshal — Anna M. Cooper
Master of Arts
Master of Arts in Education
Master of Arts in Teaching
Master of Fine Arts in Writing
Master of Liberal Arts
Master of Music
Master of Science in Biology
Student Marshals — Maurine Ogonnaya Ogbaa, Poupak Nassir Tafreshi

UNIVERSITY COLLEGE
School Color: Golden Yellow
Commencement Marshal — Carl W. Williams
Master of Health Science
Student Marshal — Madeleine Zoë Hayden
Bachelor of Science
Associate in Arts
Student Marshals — Travis Wade Byrne, Heather M. Mohr

COLLEGE OF ARTS AND SCIENCES
School Color: White
Commencement Marshal — Darla Darlene Dale
Bachelor of Arts
Bachelor of Science in Architecture
Student Marshals — Raphael Micah Byrne, Michele Shyuan Tsai, Corinn Weslyn Williams
EMERITUS APPOINTMENTS

Each year some members of the Washington University faculty reach the rank of emeritus. Through teaching, scholarship and service, they have enriched the University and the lives of their students and colleagues. In appreciation for what they have done, we record here the names of those who attain emeritus rank by the end of the academic year 2009-2010.

Christopher Byrnes
Edward H. & Florence G. Skinner Professor of Systems Science & Mathematics
At Washington University since 1988

Richard Arthur Dammkoehler
Professor of Computer Science
At Washington University since 1960

Barbara Geller
Professor of Psychiatry (Child Psychiatry)
At Washington University since 1991

Gerald Nathan Izenberg
Professor of History
At Washington University since 1976

Gary R. Jensen
Professor of Mathematics
At Washington University since 1970

Takayuki Dam Kimura
Professor of Computer Science
At Washington University since 1978

Paul C. Paris
Professor of Mechanical Engineering
At Washington University since 1976

Ambar G. Rao
Fossett Distinguished Professor of Marketing
At Washington University since 1997

Salvatore P. Sutera
Professor of Biomedical Engineering
At Washington University since 1968

Edward Nathan Wilson
Professor of Mathematics
At Washington University since 1973

Cleon R. Yohe
Associate Professor of Mathematics
At Washington University since 1966
Peter Riesenber, Ph.D., a beloved member of the Washington University faculty from 1960 until his retirement in 1993, was the mainstay of “History 101,” the history of Western civilization, for generations of students.

Dr. Riesenber, whose research focused on Western civilization, medieval history and the history of citizenship, played a key role in attracting future majors to history.

“His verve and enthusiasm over the many years were an important element in the department’s success,” Derek Hirst, Ph.D., the William Eliot Smith Professor of History in Arts & Sciences, once said of Dr. Riesenber’s impact.

Dr. Riesenber, professor emeritus of history, served on many vital University, community and national committees. According to Hirst, “He lived out in his own person the enduring focus of his research — the life of citizenship.”

Among the numerous University committees Dr. Riesenber served on were search committees for chancellor, dean of libraries and dean of the Graduate School of Arts & Sciences.

He also was chair of many committees, including the Faculty Senate Council (three times) and the Faculty Council of the Faculty of Arts & Sciences, and he was a faculty representative to the Board of Trustees.

Dr. Riesenber also was considered a “mainstay” in University College, the evening and summer program in Arts & Sciences, having taught Western civilization there for more than 30 years.

In addition, he collaborated with the late Bill Matheson, Ph.D., professor emeritus of comparative literature, in a number of team-taught courses as founding faculty in University College’s master of liberal arts program.

Dr. Riesenber received University College’s teaching award in 1987 and a Distinguished Faculty Award in 1981 at the University’s Founders Day celebration.

In 1999, an anonymous donor established an endowed scholarship in his name for his long and distinguished career at Washington University.

Born in 1925 in New York City and educated in its public schools, Dr. Riesenber entered Rutgers University in 1942. His education was interrupted by World War II, in which he served two years in the U.S. Air Force. His duties included teaching radar and editing a base newspaper in Japan. He graduated from Rutgers with a bachelor’s degree in 1947.

He earned a master’s degree in history in 1949 from the University of Wisconsin and a doctorate from Columbia University in 1954. He studied in Rome on two Fulbright Fellowships and a Cutting Fellowship from Columbia University.

He joined Washington University’s history department in 1960 after faculty positions at Swarthmore College and Rutgers University.

Among his academic honors, Dr. Riesenber served as a Fulbright scholar, a Social Science Research Council fellow and a Guggenheim fellow, all in Italy, and a fellow at the Harvard University Center for Renaissance Studies.

In 1978, he was one of 25 scholars in the country to be chosen for a nine-month appointment at the then newly completed National Humanities Center at North Carolina’s Research Triangle Park.

While at the University of North Carolina at Chapel Hill as a member of this first class of scholars, he worked on his book Citizenship in the Western Tradition: Plato to Rousseau, which surveys Western ideas of citizenship from Greek antiquity to the French Revolution.

His other books are The Humanist as Citizen, Inalienability of Sovereignty in Medieval Political Thought, The Medieval Town and his most recent, History of Citizenship: Sparta to Washington.

He has also taught at Columbia, the University of California at Berkeley, the University of Vermont, the National Taiwan University and Bowdoin College.

In 1993, Dr. Riesenber donated more than 250 books to the Washington University Libraries. The books represent a range of subjects, from classical to medieval to early modern European history.

In retirement on the seacoast of Maine, he paints and exhibits his art, reads and travels. He and his wife, Trudi Spigel, Ph.D., who coordinated Washington University’s weekly lecture series, the Assembly Series, for 20 years, have traveled widely, including notable trips to Egypt, Israel, Libya, Iran and Syria. They have four children and six grandchildren.

Still putting citizenship into practice, he has been active in local affairs, serving on several committees in his town of Harpswell and for six years on the governing board of Curtis Memorial Library in Brunswick.
HONORARY DEGREES

STEVEN CHU
DOCTOR OF SCIENCE

Steven Chu, Ph.D., a Nobel laureate and a strong advocate for alternative energy sources, was sworn in as the nation’s 12th U.S. Secretary of Energy on Jan. 21, 2009.

Dr. Chu won the 1997 Nobel Prize in physics with William Phillips and Claude Cohen-Tannoudji for developing a method to use laser beams and extreme cold to stop single atoms in their tracks, allowing them to be studied in greater detail.

He has devoted his recent scientific career to the search for new solutions to energy challenges and stopping global climate change.

Dr. Chu is charged with helping implement President Barack Obama’s agenda to invest in alternative and renewable energy, end the nation’s addiction to foreign oil, address the global climate crisis and create millions of new jobs.

Prior to his Cabinet-level appointment, Dr. Chu was director since 2004 of the Department of Energy’s Lawrence Berkeley National Lab, where he successfully led its pursuit of new alternative and renewable energies. He also was a professor of physics and molecular and cell biology at the University of California, Berkeley.

Dr. Chu was born in St. Louis in 1948 while his father taught chemical engineering at Washington University.

“Education in my family was not merely emphasized, it was our raison d’être,” he wrote in an autobiography for Les Prix Nobel, The Nobel Prizes 1997, Editor Tore Frängsmyr, [Nobel Foundation], Stockholm, 1998.

“When the dust had settled, my two brothers and four cousins collected three MDs, four PhDs and a law degree. I could manage only a single advanced degree” (a doctorate in physics from the University of California, Berkeley, in 1976).

After attending high school in New Jersey, he earned both a bachelor’s degree in mathematics and in physics from the University of Rochester in 1970. He moved to Berkeley, where he earned his doctorate and worked first as a post-doctoral fellow and then as an assistant professor.

He left in the fall of 1978 to pursue a career at AT&T’s Bell Laboratories.

Dr. Chu recalls his time at Bell Labs as being like the Disney character Mary Poppins: “practically perfect in every way,” he wrote in his autobiography for Les Prix Nobel. “Bell Labs management supplied us with funding, shielded us from extraneous bureaucracy, and urged us not to be satisfied with doing merely ‘good science’.”

“My department head, Peter Eisenberger, told me to spend my first six months in the library and talk to people before deciding what to do. A year later during a performance review, he chided me not to be content with anything less than ‘starting a new field.’ I responded that I would be more than happy to do that, but needed a hint as to what new field he had in mind.”

It was at Bell Labs that he did the work with laser cooling that would later win him the Nobel Prize in physics.

Dr. Chu left Bell labs in 1987 to join Stanford University’s faculty. While at Stanford, he expanded his research interests to include polymer physics and biophysics.

“I set about to manipulate individual DNA molecules with the so-called ‘optical tweezers’ by attaching micron-sized polystyrene spheres to the ends of the molecule. My idea was to use two optical tweezers introduced into an optical microscope to grab the plastic handles glued to the ends of the molecule,” he wrote for Les Prix Nobel.

“By 1990, we could see an image of a single, fluorescently labeled DNA molecule in real time as we stretched it out in water. Using our new ability to simultaneously visualize and manipulate individual molecules of DNA, my group began to answer polymer dynamics questions that have persisted for decades.”

Dr. Chu, who was the Theodore and Frances Geballe Professor of Physics and Applied Physics at Stanford, twice served as chair of its physics department and, together with other professors, initiated the Bio-X program, which focuses on interdisciplinary research in biology and medicine.

The recipient of many honors and awards, Dr. Chu is a member of the National Academy of Sciences, the American Philosophical Society, the Academia Sinica, the Chinese Academy of Sciences and the Korean Academy of Sciences and Technology and a fellow of the American Academy of Arts and Sciences.

He is married to Jean Chu, who holds a doctorate in physics from Oxford University. He has two grown sons by a previous marriage.
BRIAN JAY DRUKER
DOCTOR OF SCIENCE

Brian J. Druker, M.D., has set a goal to make Oregon's death rate from cancer the nation's lowest.

Dr. Druker is director of the Oregon Health & Science University (OHSU) Knight Cancer Institute and the JELD-WEN Chair of Leukemia Research.

Early in his career, Dr. Druker, a professor of medicine, was frustrated with the inconsistent effectiveness and energy-zapping side effects of chemotherapy. He believed there had to be a better way to treat cancer.

He most hated having to tell his patients with chronic myeloid leukemia (CML), which strikes about 5,000 people a year, that their disease had progressed.

More than 10 years ago, Dr. Druker developed the drug known as Gleevec, which attacks the enzyme that causes overproduction of white blood cells in CML.

The results were astonishing: Virtually every CML patient who started Gleevec saw positive results, with few, if any, side effects. CML patients in hospice were getting out of bed and walking around in a matter of days.

In 2001, less than three years after beginning clinical trials, the FDA approved Gleevec for the treatment of CML — it was the fastest-ever approval for an anti-cancer drug. The following year, the FDA approved Gleevec for the treatment of gastrointestinal stromal tumors (GIST).

Gleevec is now FDA-approved to treat seven different cancers. Dr. Druker’s work revolutionized the way cancer is treated as Gleevec is designed to zero in on specific cancer-causing molecules, eliminating cancer cells while avoiding damage to healthy cells.

“There is no question that we can defeat cancer,” says Dr. Druker. “What it requires is knowledge. When we understand what is broken, we can fix it.”

Dr. Druker says researchers like him are at a point in cancer treatments similar to where scientists were in the early 1900s as they turned infectious diseases from routinely fatal into manageable, curable or preventable diseases.

“We are on the cusp of turning cancer into a manageable disease,” he says.

Today, more than 120,000 patients with CML and 28,000 patients with GIST — and eventually thousands more — are expected to live longer and better lives thanks to Dr. Druker’s transformative research. He has set a goal of treating all cancers with drugs like Gleevec.

Now, Dr. Druker is developing more effective treatments for patients whose leukemia recurs while taking Gleevec. In addition, he is studying why most patients on the drug have minute levels of cancer that linger even after treatment. He is also looking for other molecular targets in leukemia to develop drugs to block them.

However, Dr. Druker does not spend all of his time in the laboratory.

Earlier in his career, while investigating signaling proteins and their link to human disease, he felt too far removed from the patients he was trying to help. He began treating patients at a community cancer clinic, which became a driving force in his career and in his goals to work harder and faster to develop new and better therapies. He keeps a bulletin board in his office covered with patient photos as inspiration.

A Minnesota native, Dr. Druker earned a bachelor's degree and a medical degree from the University of California, San Diego.

In 1981 he came to Washington University School of Medicine and Barnes-Jewish Hospital for an internship and residency in internal medicine, and then completed a three-year fellowship in oncology at Dana-Farber Cancer Institute at Harvard Medical School. He was an instructor at Harvard Medical School for seven years before joining OHSU in 1993 as an associate professor.

Dr. Druker has received numerous awards and accolades for his work, among them the American Cancer Society’s Medal of Honor, Lance Armstrong Foundation’s Pioneer of Survivorship Carpe Diem Award and the Kettering Prize from General Motors Cancer Research Foundation.

In 2009, Dr. Druker received the Lasker-DeBakey Clinical Medical Research Award, which is widely regarded as the most prestigious medical research award and often foreshadows future recognition by the Nobel Prize committee.

He was named a Howard Hughes Medical Institute Investigator in 2002 and elected to the Institute of Medicine in 2003 and to the National Academy of Sciences in 2007.

Dr. Druker and his wife, Alexandra, live in Portland, Oregon, and have three children.
JOANNE PARRISH KNIGHT
DOCTOR OF HUMANITIES

Joanne Knight exemplifies the highest spirit of service to the community, setting a standard for volunteerism and commitment to St. Louis and the region.

Mrs. Knight has focused much of her energy on the support of three community organizations and institutions: the St. Louis chapter of the Alzheimer's Association, the Central Institute for the Deaf and Washington University in St. Louis.

Mrs. Knight's devotion to the Alzheimer's Association grew from her experience with the disease, which afflicted her late mother in the 1980s. Dealing with her mother's illness gave her insight into the physical and emotional needs of Alzheimer's victims and their families.

For nearly two decades, Mrs. Knight has been active in the St. Louis chapter of the Alzheimer's Association as a volunteer, advisory board member and director, including serving a term as president.

At the Central Institute for the Deaf, Mrs. Knight has added her energies to those of a dedicated staff, supportive parents and hard-working students. She has been a member of the CID board of directors for 26 years, including serving as board vice president, chairman of the Scholarship Committee and a member of the Nominating and Executive committees and supporting fundraising.

The CID created the Joanne Parrish Knight Family Center in recognition of her contributions and efforts over many years.

Mrs. Knight and her husband, Charles F. Knight, former chief executive officer of Emerson for 27 years and now chairman emeritus, have also established a strong philanthropic legacy at Washington University.

The Joanne Knight Breast Health Center and Breast Cancer Program at the Alvin J. Siteman Cancer Center at Washington University's School of Medicine and Barnes-Jewish Hospital was dedicated in 2007. The Center serves more than 50,000 women annually.

At the time of the dedication, Chancellor Mark S. Wrighton said, "The Knights' long history of generosity and support has had a profound impact upon the growth and success of not only the Siteman Cancer Center, but also the entire Washington University community. It is not an overstatement to say that their generosity will help better and, in many cases, save the lives of thousands in need."

The Knights have also underwritten the Charles F. and Joanne Knight Distinguished Professorship in Orthopaedic Surgery at the School of Medicine and the Charles F. and Joanne Knight Distinguished Directorship in Executive Education at the Olin Business School.

Mrs. Knight is a charter member of the Siteman Cancer Center Community Advisory Board, and she has served on the Washington University School of Art National Council.

Most recently, Washington University recognized the Knights' generous support for Alzheimer's disease research by naming its world-renowned Alzheimer's Disease Research Center in their honor.

This respected medical research center focuses on the most promising research, with the goal of funding exceptional scientific projects to help discover more effective treatments for Alzheimer's disease and its eventual prevention.

Over the years, Mrs. Knight has lent her enthusiasm and talents to a number of additional projects. She was a member of the board of St. Luke's Hospital for 13 years and was the first woman to serve as its chairman. In addition to holding other board offices, she worked as a volunteer in the hospital's Physical Therapy Department.

She has also been actively involved with the Saint Louis Art Museum, serving on the Board of Trustees and the board of the Friends of the Art Museum.

Her many contributions to the community were recognized in 1987 when she was named a Woman of Achievement by the Suburban Journals and KMOX Radio and a decade later when she was the Variety Club Woman of the Year in 1997.

Mrs. Knight was born in Nashville, Tennessee, and grew up in Chicago, where her father was the chief editorial cartoonist for the Chicago Tribune. She has also lived in New York State, Germany and Switzerland.

Joanne and Chuck Knight, who received an honorary doctor of science in 1996 in recognition of his service to Washington University and the St. Louis community, have been residents of St. Louis since 1972. The Knights have four children and 12 grandchildren.
RICHARD ARTHUR ROLOFF
DOCTOR OF LAWS

As executive vice chancellor of Washington University, Richard A. Rollof used his extensive experience in commercial real estate development and finance to transform and modernize the University's Danforth and Medical campuses.

Mr. Rollof was executive vice chancellor from 1991-2006, during which time he led Washington University's administrative areas — from finance and investments to landscaping and facilities maintenance — as well as construction and renovation efforts on University buildings.

Mr. Rollof's achievements at the University include spearheading the construction of McDonnell Hall, Goldfarb Hall, Anheuser-Busch Hall, the Charles F. Knight Executive Education Center, the Psychology Building, the Arts & Sciences Laboratory Science Building, Uncas A. Whitaker Hall for Biomedical Engineering, the Earth and Planetary Sciences Building, residential colleges on the South 40, The Village housing and the Sam Fox School of Design & Visual Arts buildings.

He also led the complete renovation of a number of existing historic buildings, including Brookings Hall, Duncker Hall, Eads Hall and Holmes Lounge in Ridgley Hall.

Mr. Rollof also instituted several University programs, including a deferred maintenance fund to upgrade buildings and grounds and the Supplier Diversity Initiative, which has increased the participation of women and minorities in construction projects and in supplying material and services to the University.

Mr. Rollof also was active in the revitalization of St. Louis’ Central West End area near Washington University's School of Medicine through his support and leadership as a volunteer in the Washington University Medical Center Redevelopment Corporation. This 185-acre private redevelopment project surrounds the Medical Campus and received national acclaim for its successful approach to non-subsidized urban development.

Beginning in 2006, Mr. Rollof became vice chancellor for capital projects and oversaw the planning, cost and timely completion of such major construction projects as Seigle Hall, the Danforth University Center and its underground parking garage, and the second phase of the Snow Way Garage.

In 2008, he was appointed special assistant to Chancellor Mark S. Wrighton, a position in which he provides additional guidance to the chancellor and his senior leadership team on ongoing capital projects and real-estate matters, including the recently completed state-of-the-art Stephen F. and Camilla T. Brauer Hall for the School of Engineering & Applied Science.

Mr. Rollof, a St. Louis native, earned a bachelor of science degree in industrial engineering from the University in 1951. Attending Washington University is a tradition for the Rollof family: Richard Rollof’s father, Robert, earned a bachelor of science in commerce in 1923, and Richard’s late wife, Peggy, earned a bachelor of arts in psychology in Arts & Sciences in 1952. Their daughter Kathryn R. Capps has kept the tradition alive and is receiving a bachelor of science in communications and journalism today from University College in Arts & Sciences.

After graduation, Richard joined the U.S. Coast Guard and eventually settled in south Texas. He operated a single-family home construction business in Texas beginning in 1953. He also was president of Merchants Marine State Bank in Texas from 1958-1969.

In 1969, he moved to St. Louis to become executive vice president of Alfred H. Mayer Co., a residential development firm. In 1973, he became president of Capitol Land Co., a real-estate development company. Its projects under Mr. Rollof’s tenure included Plaza Frontenac and The Ritz-Carlton, St. Louis.

In 1976, Mr. Rollof, an established leader in St. Louis real-estate development, received an Alumni Achievement Award from the School of Engineering. The Clayton Chamber of Commerce named him its Businessperson of the Year in 1991.

Mr. Rollof was elected to the University’s Board of Trustees in 1985. During his tenure with the board, he served on the Executive Committee, Real Estate Committee and chair of Building and Grounds Committee. He also headed the Major Gifts Committee for the School of Engineering and served on the school’s National Council.

He served on the board until 1991, when he joined Washington University as executive vice chancellor under then-Chancellor William H. Danforth.

Mr. Rollof received the Arts & Science’s Dean’s Medal in 2000 for his distinguished and enduring contributions to the advancement of Washington University and the School of Engineering’s Dean’s Award in 2007.

Mr. Rollof, who resides in University City, Mo., is the father of four children and seven grandchildren.
NELSON S. TALBOTT III
DOCTOR OF LAWS

Strobe Talbott is president of the Washington, D.C.-based Brookings Institution, considered America’s most influential, most quoted and most trusted think tank.

Mr. Talbott, whose career spans journalism, government service and academe, is an expert on U.S. foreign policy, with specialties on Europe, Russia, South Asia and nuclear arms control.

As deputy secretary of state in the Clinton administration, Mr. Talbott was deeply involved in both the conduct of U.S. policy abroad and the management of executive branch relations with Congress.

Born in Dayton, Ohio, in 1946, he attended The Hotchkiss School, an independent boarding school in Lakeville, Connecticut, and Yale University, where he earned a bachelor's degree in 1968. He earned a master's degree from Oxford University in 1971, where he was a Rhodes Scholar.

Mr. Talbott entered government service after 21 years with Time magazine. As a reporter in the 1970s, he covered Eastern Europe, the State Department and the White House.

He was a diplomatic correspondent from 1977-1984, before taking over as Time's Washington bureau chief from 1984-89 and then editor-at-large and foreign affairs columnist from 1989-1992.

Mr. Talbott twice won the Edward Weintal Prize for distinguished reporting on foreign affairs and diplomacy, in 1980 and 1985. His contributions were also cited in three Overseas Press Club Awards to Time in 1982, 1987 and 1989.

Before becoming president of Brookings in July 2002, Mr. Talbott served as founding director of the Yale Center for the Study of Globalization.

Prior to that, he had served in the State Department from 1993-2001, first as ambassador-at-large and special adviser to the secretary of state for the new independent states of the former Soviet Union, then as deputy secretary of state for seven years.

As president of Brookings, he leads a staff of more than 270 people, including a number of the world’s leading public policy scholars, and presides over an endowment of more than $200 million.

The Brookings Institution and Washington University formed an academic partnership in April 2009. The two entities have begun offering joint programs, including internships, lectures and other educational activities. The Olin Business School leads the management of Brookings’ executive education activities.

Mr. Talbott is the author of a number of books on diplomacy, U.S.-Soviet relations and U.S.-Soviet arms control.

Among his books is The Great Experiment: The Story of Ancient Empires, Modern States, and the Quest for a Global Nation, published in January 2008, which combines historical and political analysis with personal reflection on efforts to forge a peaceful community of nations.

He is also the author of Engaging India: Diplomacy, Democracy, and the Bomb; The Russia Hand: A Memoir of Presidential Diplomacy; At the Highest Levels: The Inside Story of the End of the Cold War; The Master of the Game; Reagan and Gorbachev; Deadly Gambits; The Russians & Reagan; and Endgame: The Inside Story of Salt II. He translated and edited two volumes of Nikita Khrushchev’s memoirs in the early 1970s.

In his most recent book, Fast Forward: Ethics and Politics in the Age of Global Warming, published this month, he and co-author William Antholis, managing director of the Brookings Institution, look at the threat global warming poses and their recommendations for action.

He has been a fellow of the Yale Corporation; a trustee of The Hotchkiss School and the Carnegie Endowment for International Peace; a director of the Council on Foreign Relations; and a member of the North American Executive Committee of the Trilateral Commission and of the Association of American Rhodes Scholars.

He is a member of the participating faculty of the World Economic Forum, the Aspen Strategy Group at the Aspen Institute and the American Academy of Diplomacy. In 2007-08, he served as a member of the National Commission on War Powers.

In 2009, he was elected a fellow of the American Academy of Arts & Sciences.

Mr. Talbott was married to Brooke Shearer, a former journalist and Clinton administration official, for 38 years until her death in May 2009. They raised two sons, Devin and Adrian Talbott. He has two grandchildren and he lives in Washington, D.C.

Graduate Recognition Ceremony — Edison Theatre
Reception Immediately Following — Lopata Gallery

The Following Programs Begin at 3:00 p.m.

JOHN M. OLIN SCHOOL OF BUSINESS
Graduate Diploma and Awards Ceremony — Field House, Athletic Complex
Reception Immediately Following — Simon Hall

SCHOOL OF MEDICINE
Commencement Recognition Ceremony — Ferrara Theater, America's Center
Reception Immediately Following — Atrium, America's Center
A Look Back at Commencement at Washington University
The first five students graduated from Washington University's Collegiate Department: Henry Anderson; twins Charles and Henry Branch; Thomas Lamb Eliot (son of University co-founder William Greenleaf Eliot); and Regis Chauvenet (son of William Chauvenet, chair of mathematics and astronomy and later chancellor from 1862 to 1869). They immediately formed the University's first Alumni Society.

1862

Phoebe Couzins was the first woman graduate of the law school, the first woman law graduate in Missouri, and the third woman to graduate from any law school in the United States. She went on to become the first woman U.S. marshal, as well as a leader in the women's suffrage movement.

1871

1889

Walter Moran Farmer, a law student, became the first African American to earn a degree from Washington University. He became the first African-American lawyer to argue before the Missouri Supreme Court.

1906 Class Day Procession

1895

Anna Isabel Mulford, a graduate student in the botany program, was the first student to earn a doctoral degree from the University. Her dissertation examined Agaves in the United States and, as part of her research, she discovered several species that were subsequently named for her, including “Mulford's milkvetch” (astragalus mulfordiae), which she discovered in 1892 near Boise, Idaho.
**1905**
The first Commencement ceremony held on the Hilltop Campus. The formal dedication of the Hilltop Campus took place at the ceremony.

**From the 1920s to the early 1960s**
Commencement was held in the Field House.

**1928**
Charles Lindbergh was slated to receive an honorary degree, but he canceled at the last minute and was awarded the degree in absentia. He was to pick up the degree later but never did so. In 1996, the degree was uncovered in the School of Law when the faculty and staff were moving from Mudd Hall to Anheuser-Busch Hall.

**1949**
The Lamp of Learning was passed on during ceremony at the Alumni-Senior dinner.

**1951**
General George Marshall, author of the Marshall Plan, delivered the Commencement address. Here he poses for a photo with Chancellor Arthur Holly Compton.
Teach for America founder Wendy Kopp spoke at Commencement.

The Commencement ceremony moved to a temporary stage built in front of Ridgley Hall in the Brookings Quadrangle. In 1965, Beaumont Pavilion became the ceremony’s permanent home.

1963

St. Louis Cardinals quarterback Charlie Johnson earned his master’s degree and later his doctoral degree in chemical engineering from Washington University while playing in the NFL.

1974

Ella Fitzgerald receives an honorary degree.

For more on Washington University's history, a history book commissioned for the Sesquicentennial, *Beginning a Great Work: Washington University in St. Louis, 1853-2003*, by Candace O'Connor, is available in the Campus Bookstore.

Chancellor William Danforth at Commencement 1974.

Journalist Tim Russert spoke at Commencement.

Teach for America founder Wendy Kopp spoke at Commencement.
Commitment to Open and Respectful Events

Washington University fully embraces a commitment to presenting a wide diversity of ideas and opinions, as well as encouraging free discussion of those ideas and opinions.

It is with this commitment in mind the University agrees that event proceedings and guest speakers should expect to be heard without interference from or harassment by those who oppose their views or positions, and that posters, banners, noisemakers, and other distractions should not be brought into the presentation area during a program or talk, so that an environment free of interference, distraction, and intimidation shall be maintained.

The Washington University policy is: No placards, banners, noisemakers, and other distractions are permitted in outdoor or indoor presentation areas on campus – either in support of or in opposition to speakers or event proceedings. Groups and individuals are free to gather outside of these venues and presentation areas to leaflet, to display posters and banners, to distribute literature, and to express their concerns – as long as they do not obstruct entry, disrupt event proceedings, interfere with speakers' ability to be heard, or otherwise deny the audience an interruption-free event.
Dear Alma Mater,
Thy name is sweet to me.
Our hearts are all for thee
Fair Washington.
Thy halls shall honored be
Throughout this great country
For all eternity, Our Washington.

Those days of youth which
All of us spent with thee
Form a dear history,
Fair Washington.
Could they renewed be,
We’d live our days with thee
For all eternity, Our Washington.
