Chancellor George R. Throop,
Washington University,
Saint Louis, Missouri.

Dear Chancellor Throop:

We wish to thank you for your understanding reply to Dr. Barstow's letter of June 17th inquiring as to whether your institution would be willing to consider applications of American students of Japanese extraction. We shall in the near future hear from the proper governmental authorities as to the conditions under which it will be possible for such students to attend your school.

Our Committee on the West Coast is gathering together, as quickly as possible, the necessary data for each student who would like to be placed. Students with the highest ratings both academically and personally will be those recommended for placement in the openings now available.

You will hear from us again as we become clear on the above points.

Sincerely yours,

[Signature]

For
Robbins W. Barstow, Director
Japanese American Student Relocation
